

6MBI100VA-060-50

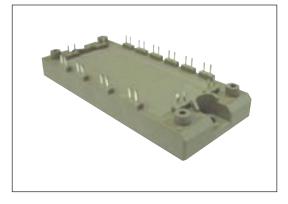

IGBT MODULE (V series) 600V / 100A / 6 in one package

Features

Compact Package P.C.Board Mount Low VCE (sat)

Applications

Inverter for Motor Drive AC and DC Servo Drive Amplifier Uninterruptible Power Supply Industrial machines, such as welding machines

Maximum Ratings and Characteristics

• Absolute Maximum Ratings (at Tc=25°C unless otherwise specified)

Items			Symbols	Conditions		Maximum ratings	Units	
	Collector-Emitter voltage		Vces			600	V

Sc	rew torque	torque Mounting (*3)		M5		3.5	N m	

Note *1: All terminals should be connected together during the test.

Note *2: Two thermistor terminals should be connected together, other terminals should be connected together and shorted to base plate during the test.

Note *3: Recommendable value : 2.5-3.5 Nm (M5)

WARNING

 This Catalog contains the product specifications, characteristics, data, materials, and structures as of October 2008. The contents are subject to change without notice for specification changes or other reasons. When using a product listed in this Catalog, be sure to obtain the latest specifications.
2. All applications described in this Catalog exemplify the use of Fuji's products for your reference only. No right or license, either express or implied, under any patent, copyright, trade secret or other intellectual property right owned by Fuji Electric Device Technology Co., Ltd. is (or shall be deemed) granted. Fuji Electric Device Technology Co., Ltd. makes no representation or warranty, whether express or implied, relating to the infringement or alleged infringement of other's intellectual property rights which may arise from the use of the applications described herein.
3. Although Fuji Electric Device Technology Co., Ltd. is enhancing product quality and reliability, a small percentage of semiconductor products may become faulty. When using Fuji Electric semiconductor products in your equipment, you are requested to take adequate safety measures to prevent the equipment from causing a physical injury, fire, or other problem if any of the products become faulty. It is recommended to make your design fail-safe, flame retardant, and free of malfunction.
4. The products introduced in this Catalog are intended for use in the following electronic and electrical equipment which has normal reliability requirements. • Computers • OA equipment • Machine tools • Audiovisual equipment • Communications equipment (terminal devices) • Measurement equipment • Industrial robots etc.
 5. If you need to use a product in this Catalog for equipment requiring higher reliability than normal, such as for the equipment listed below, it is imperative to contact Fuji Electric Device Technology Co., Ltd. to obtain prior approval. When using these products for such equipment, take adequate measures such as a backup system to prevent the equipment from malfunctioning even if a Fuji's product incorporated in the equipment becomes faulty. Transportation equipment (mounted on cars and ships) Traffic-signal control equipment Emergency equipment for responding to disasters and anti-burglary devices Medical equipment
 6. Do not use products in this Catalog for the equipment requiring strict reliability such as the following and equivalents to strategic equipment (without limitation). Space equipment Aeronautic equipment Nuclear control equipment Submarine repeater equipment
